How do I get 220V from a 110 volt inverter?

You would have to get a step-up transformer(perhaps auto-wound for lower costs) to get 220 from a 110 inverter. Re: 220v from two inverters? Aloha,Can I parallel two of the same MSW inverters @110v each and get 220v single phase? If so,then would I tie the two neutrals together? Reference my system below. thanks

Can a 220V inverter be used in series?

Re: 220v from two inverters? You can put in series(two 120 VAC units into "one" 240 VAC w/neutral unit),if the units you have have been designed for synchronized operation (I believe,with an external control cable that runs between the two units--such as some Outback units will).

Can a 240V inverter be connected to a 120V volt?

The trick is if you have any 240vac loads they could have any voltage from 0 to 240v as the two inverters won't likely be in sync or stay in sync with one another,even matching ones. All devices will be 120V,no 240V appliances,so no problem there.
