The Port Authority of New York and New Jersey and Port Newark Container Terminals (PNCT), marked a milestone with the completion of one of the largest solar power ...

The PNCT system is a catalyst for further energy transitioning, evidenced by TIL looking to PNCT and Standard Solar to integrate renewable solutions at other ports like Long Beach, Baltimore, ...

Technology: 7.2 MW ground- and canopy-mounted solar PV across 7.8 acres of container terminal.^1 Key Metrics: Supplies ~50 % of terminal's annual electricity; excess fed to grid; ...

"By working hand-in-hand with PNCT and the city of Newark, our seaport is now home to a large solar energy project capable of generating significant energy for one of its ...

Generating renewable power on-site at the port terminals can significantly reduce this off-site pollution,
