With the right approach, the Asia-Pacific region can transform EV battery waste from a daunting environmental challenge into a powerful engine for inclusive and sustainable ...

Lithium-ion batteries, essential for EVs and renewable energy storage, are driving the push for advanced recycling technologies. Their material ...

The ASEAN EV battery pack market encompasses several other critical materials including lithium, cobalt, manganese, and nickel, each playing vital roles in battery chemistry ...

The ASEAN EV battery pack market refers to the comprehensive ecosystem encompassing the design, production, distribution, and servicing of battery systems specifically engineered for ...

In a significant stride towards sustainable energy and environmental conservation, the Association of Southeast Asian Nations (ASEAN) is gearing up to implement ...

The ASEAN EV battery pack market faces constraints including the high initial cost of EVs and battery packs, limited charging infrastructure in certain areas, and concerns regarding the ...

This research investigates the optimal distribution of the battery electric vehicle (BEV) supply chain across ASEAN member states (AMS) by analyzing the interplay of intrinsic ...

Experts are worried that Southeast Asia has fallen behind in recycling at a time when governments in the region are pushing to ...

This chapter provides an overview of electric vehicle (EV) policies in selected Association of Southeast Asian
