-----  
Will Romania re-launch a battery energy storage tender?

On 8 February, the Ministry of Energy of Romania announced the re-launch of its tender for battery energy storage projects and investments in the manufacturing sector for the production of energy storage equipment and solar panels.

How much will Romania spend on a battery energy storage project?

To achieve this goal, the Romanian government will conduct both tenders through competitive bidding. A total of EUR79.6 million is allocated for the battery energy storage project. EUR199 million will be spent on related manufacturing capacity. Of this amount, EUR149.25 million will be used for new cell production, assembly and recycling facilities.

Why do companies bid for energy storage tenders?

Bidding for energy storage tenders is extremely lucrative for companies of all sizes. Tendering authorities and private companies release thousands of contracts worth millions for procurement of energy storage. Global Tenders stands out as the largest platform dedicated to tenders and government contracts.

Why should Romania invest in energy storage batteries and photovoltaics?

If Romania can gain an advantage in the energy storage battery and photovoltaic industry and attract industrial capital from inside and outside the EU to invest in this field, it will help the EU to realise an autonomous and controllable sustainable energy supply chain.
