-----

Chinese scientists have built a solar battery that captures sunlight and stores electricity at the same time with 4.2 percent efficiency.

By supporting intermittent solar and wind energy, it aids in maintaining grid stability. The grid-forming capabilities offered by the Sodium-ion Battery system allow the plant to ...

The facility supports more than 30 local wind and solar power stations, alleviating the impact of intermittent supply and facilitating the ...

Falling costs of storage and need to tailor output of solar is encouraging China PV giants to double up on solar and batteries, and ...

Chinese renewable generation reached 366 terawatt-hours (TWh), making wind and solar the country's largest sources of new power. This transformation has also driven the ...

Chinese renewable generation reached 366 terawatt-hours (TWh), making wind and solar the country's largest sources of new ...

Falling costs of storage and need to tailor output of solar is encouraging China PV giants to double up on solar and batteries, and build the projects themselves.

Battery deployment tripled in three years, with China adding more in 2024 than the US and EU combined. In the first half of 2025, wind and solar deployment was more than double ...

Now Lucky Cement is working to plug the energy gap by storing power captured from 110-metre-tall wind turbines and a sea of shimmering solar panels sourced from China in ...

China already has the world's largest battery energy storage fleet - some 40% of the global total - driven in part by local government mandates for developers to add storage to ...

Leveraging its robust supply chain, government-backed innovation, and large-scale production capabilities, Chinese ...

The facility supports more than 30 local wind and solar power stations, alleviating the impact of intermittent supply and facilitating the integration of high shares of renewables ...

Leveraging its robust supply chain, government-backed innovation, and large-scale production capabilities, Chinese manufacturers lead the way in providing cutting-edge lithium ...

China has switched on a record-breaking vanadium flow battery in Xinjiang, pairing it directly with a 1 gigawatt solar farm to soak up desert sunshine and feed it back into the grid after dark ...
