How EV charging infrastructure is growing in Germany?

The growth of electric vehicle (EV) charging infrastructure in Germany has made significant progress over the past year. According to the 2024 Electric Charging Network Ranking, published by the German Association of the Automotive Industry (VDA), by 1st July 2024, there were 142,793 public chargers registered, of which 30,048 are fast.

Do EV owners need public charging facilities in Germany?

While most EV owners could install or already had access to private charging facilities, the German public charging network also needs to match the growing electric vehicle fleet. Log in or register to access full data. Discover all statistics and data on Electric vehicle charging infrastructure in Germany now on [statista.com](https://www.statista.com)!

Where can you charge a car in Berlin?

This also applies to the CHAdeMO standard, which originates in Japan, and the U.S. manufacturer Tesla, which offers its own plug and charging system. You can charge relatively worry-free at over 1,700 publicly accessible charging points in Berlin. Relatively, because the vehicle must fit the charging offer.

Where are the best EV charging locations in Germany?

Within the locality rankings, Emden, in Lower Saxony, leads with the best ratio of EVs to charging points in Germany. Currently, only 4.5 EVs depend on each public station, a figure that stands out when compared to other areas. Overall, Heilbronn and the Oder-Spree district also show good results, with an average of 4.7 EVs per charging location.

On average, around 7.5 vehicles have to share a charging point. That is roughly the same number as in the previous year. There are more and more public charging points in ...
