-----

Quidnet Energy, ENBW, and Peak Energy have energy storage projects in the works in the U.S. and Europe. A Texas startup has ...

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy ...

Welcome to the Grid Storage Launchpad (GSL), a national capability for energy storage research located on the Pacific Northwest National Laboratory (PNNL)-Richland campus in Washington.

These examples illustrate the diverse applications and benefits of grid-scale energy storage projects, highlighting their role in fostering grid stability and supporting the transition to a low ...

As the U.S. power grid faces growing challenges--ranging from renewable intermittency and peak demand spikes to extreme weather events and aging ...

Government Market News | Mary Scott Nabers Insights | Battery storage projects surge as utilities prepare for next grid era in 2026 | Battery storage projects nationwide are ...

The U.S. has 431 operational battery energy storage projects, 8 using lead-acid, lithium-ion, nickel-based, sodium-based, and flow batteries. 10 These projects totaled 27 GW of rated ...

US utilities are poised for a massive energy storage expansion, with over 18.5 GW planned. Learn about state targets, innovative technologies, and the future of grid modernization.

Quidnet Energy, ENBW, and Peak Energy have energy storage projects in the works in the U.S. and Europe. A Texas startup has completed a key test for its long-duration ...

LPO can finance short and long duration energy storage projects to increase flexibility, stability, resilience, and reliability on a renewables-heavy grid.

Several storage technologies are in use on the U.S. grid, including pumped hydroelectric storage, batteries, compressed air, and flywheels (see figure). Pumped ...
