What is a k & d curve breaker?

The ideal application is a circuit with a motor load. The K and D curve breakers are both designed for motor applications where ampacity rises quickly and momentarily during "start-up." Both curves can "ride through" the momentary inrush of current and prevent nuisance tripping while providing protection to the circuit.

What is a D-trip circuit breaker?

Breakthrough current is the maximum current that the circuit breaker can safely stop in the event of a short circuit. D-trip circuit breakers prevent nuisance tripping, so they are best for equipment that has a high spike in current at startup, such as transformers, power supplies, and heaters.

Can I get free shipping on a circuit breaker?

Any order over \$100 qualifies for free shipping, but we can also ship any breaker. We also offer next-day-delivery for all emergency situations. We offer a unique selection of circuit breakers to fit the needs of many.

Looking for a reliable China manufacturer, supplier, or factory for your D Curve Breaker needs? Look no further than our high-quality products. Shop now!
