Why is Mozambique acquiring 25-30 MW of solar PV?

The procurement of 25-30 MW of solar PV is the first stage of implementation of the program which will contribute to the diversification of Mozambique's power mix and improve power supply quality, whilst ensuring low-cost energy for Mozambican end users

When did Globeleq & Mozambique launch a solar power plant?

Our solar power plant in Cuamba was inaugurated in September of 2023. It marked another milestone for Globeleq and Mozambique, as it was the first IPP to integrate a utility-scale energy storage system.

Is battery storage a key technology for Mozambique's future?

Globeleq sees battery storage as a key technology for Mozambique's future. Storage costs are expected to continue decreasing, so those systems will become more competitive and will be able to contribute more.

Can Mozambique become a power exporter?

South Africa has a critical shortage of electricity, and Zambia and Zimbabwe also require power. There is a significant opportunity for Mozambique to increasingly become a power exporter. One of the big challenges of Mozambique is its size and shape, which make the transportation of electrons across the country quite expensive.

Commercial operations at the 19MWp Cuamba Solar PV and 7MWh battery energy storage plant in Mozambique are officially underway. The plant supplies clean energy to ...

the user's solar panel array. The inverter must be able to handle the power input from the solar panels; exceeding the inverter's limit will result in excess power being clipped, leading to ...

Recently announced, the tender aims to select two independent power producers (IPPs) to develop, finance,
