"Recent climate events highlight the urgency of transitioning to clean energy solutions. Solar power paired with battery storage is a vital strategy to support reliability for the ...

California is adding battery storage at a pace never seen before as we continue our work to build the grid of the future. The key to a cleaner, more reliable power grid is ...

California hasn't issued an emergency plea for the public to conserve energy, known as a Flex Alert, since 2022. Experts credit much of the progress to a surge in battery ...

California hasn't issued an emergency plea for the public to conserve energy, known as a Flex Alert, since 2022. Experts credit much ...

Luna Storage and LAB are standalone lithium-ion battery storage projects in Lancaster, Los Angeles County, California. These projects store clean energy for use during periods of high ...

"This report clearly demonstrates the significant gap between the economic and social impacts of gas plants and those of battery ...

Solar power and battery storage are essential for Southern California's energy resilience and sustainability. Together, they ensure a reliable energy supply during outages or ...

"This report clearly demonstrates the significant gap between the economic and social impacts of gas plants and those of battery storage paired with clean energy."

Since then, LADWP has worked to deliver the Eland project as one of the lowest cost solar and battery storage projects ever built that will deliver low-cost renewable energy to ...

New Energy Battery Storage

California is adding battery storage at a pace never seen before as we continue our work to build the grid of the future. The key to a ...

Given the importance of battery storage to grid resiliency and integration of renewable energy, the California Legislature may be open to changes in state law to make ...

Next-level energy storage systems are beginning to supplement the familiar lithium-ion battery arrays, providing more space to store wind and solar energy for longer ...

Luna Storage and LAB are standalone lithium-ion battery storage projects in Lancaster, Los Angeles County, California. These projects store clean ...

Breakthroughs in battery technology are transforming the global energy landscape, fueling the transition to clean energy and reshaping industries from transportation to utilities.
