Overview Three-phase inverter Classification Maximum power point tracking Grid tied solar inverters Solar pumping inverters Solar micro-inverters Market A three-phase inverter is a type of solar microinverter specifically design to supply three-phase electric power. In conventional microinverter designs that work with one-phase power, the energy from the panel must be stored during the period where the voltage is passing through zero, which it does twice per cycle (at 50 or 60 Hz). In a three phase system, throughout the cycle, one of th...
