---

In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini power station using solar panels.

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Semi-permanent solution that provides autonomous power for short-term security projects, temporary emergency deployments, or remote surveillance and monitoring.

At Solarcraft, we build rugged, built-for-purpose commercial and industrial AC & DC Uninterruptible Power Supply (UPS) solutions for critical loads where an "off-the-shelf" solution ...

Dual mains input Increases availability by allowing the UPS to be connected to two separate power sources. SmartSlot Customize UPS capabilities with management cards. Hot ...

Lithium battery storage can provide reduced grid power consumption during peak periods, thereby reducing electricity bills. In addition IQUPS can supply power continuity by instantly switching ...

Our AC/DC Outdoor UPS(TM) back-up systems provide a complete, uninterruptible power supply that integrates quickly with batteries, loads, and monitors. DC systems are available in 12, 24 ...

Traditional uninterruptible power supplies (UPS) have long been used to bridge power gaps during outages. However, with the increasing demand for renewable energy, more people are ...

The UPS provides up to 60 minutes of runtime, depending on load and configuration, ensuring extended
