What is LV switchgear panel?

The LV Switchgear panel does not take up much of your room space and is also quite durable. Apart from serving as a virtual device in protecting your appliances from short circuits, LV Switchgear Panel also helps in the isolation of parts of installation as well as remote local switching.

What is main LV distribution switchgear?

Our Main LV. Distribution Switchgear utilises the same flexible design principles as incorporated within our sub-distribution board assemblies ensuring an equally adaptable system. Specialised interface busbars for the extension of existing Switchgear. Front and rear access formats available for operation and maintenance.

What is the difference between LV and MV panels?

LV panels handle voltages up to 1000V AC, while MV panels manage voltages from 1kV to 36kV AC, catering to diverse industrial and infrastructure needs. JV Power Technologies' panels adhere to international standards, emphasizing safety and performance.
